

UR064000 4000mL Urine Bag

Product Improvement Notice

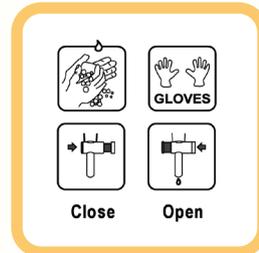

Multigate Medical Devices (m|devices) has initiated a product improvement on the 4000mL Urine Bag (UR064000).

The 4000mL Urine Bag is designed for large volume urine capture and is ideally suited to overnight use. To improve product performance, a widened spout is now featured on the T-Tap outlet – facilitating faster and easier emptying. Testing indicates that the bag empties at twice the speed of the previous version – halving the users’ time to empty it.

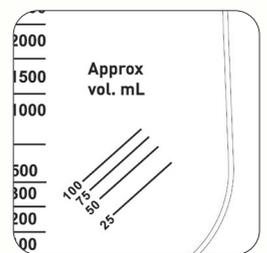

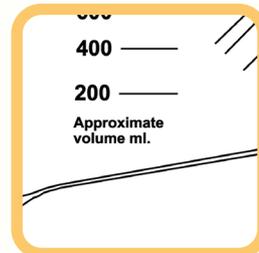

There is no change to pricing associated with this update.

New stock release is estimated to be in March 2026 however timing may vary depending on current stock sell-through.

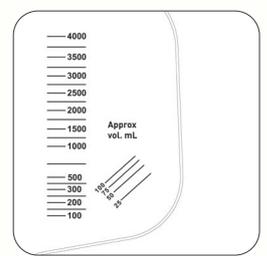

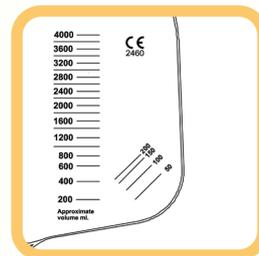

Visual Variances

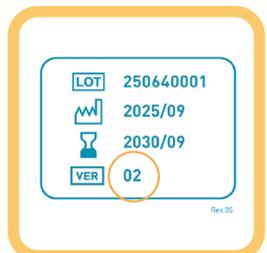

1. New version has additional image of T-Tap Open/Close function

2. New version has moved the 'Approx Volume' wording to underneath metrics

3. Metrics are more detailed on improved bag for both total volume and small volume metrics Different fonts are used.

4. T-Tap outlet is wider for faster and easier drainage

5. VER 02 on the packaging indicates new product version
